Help up improve our services**

Sydney Dental Hospital Consumer and Community Network

Oral Health Service and Sydney Dental Hospital

Oral Health Service and Sydney Dental Hospital aims to protect, promote, maintain and improve the oral health of the people of Sydney

Local Health District. We work to deliver high quality, affordable and well-managed dental services for our patients and clients.

Sydney Dental Hospital provides services to a diverse range of populations across Sydney Local Health District and the state, including: children and adolescents, older people, people on a low income, people living with a disability, Aboriginal communities and people from culturally and linguistically diverse communities.

We invite you to be a part of our Consumer and Community Network

Sydney Dental Hospital and Oral Health Services works closely with the local community to improve on the delivery of dental services. We are always looking to recruit members to join our **Consumer and Community Network**.

The Network is made up of patients, carers, family members and Sydney Dental Hospital staff.

Who are we looking for?

We are currently looking for patients and family members that use the services at the Sydney Dental Hospital. No experience is necessary.

We are looking for people who are willing to provide advice to the Sydney Dental Hospital; help us in identifying priority areas for action; advocate on behalf of other patients; and, participate on strategic planning activities for the Hospital.

If you are interested, please contact **the Community Participation Coordinator**.

What's involved?

The Network meets 6 times a year. Members of the Network are involved in:

- looking at redesigning the patient waiting rooms;
- Improving the accessibility of our services for people living with a disability;
- reviewing brochures; and,
- a number of other activities.
