

Name of service/Department	PROSTHETIC LABORATORY
Brief description of service/department	<p>The Dental Prosthetic Laboratory provides lab services producing removable and fixed Prosthodontic and Orthodontic Appliances, meeting the demands of the clinical work generated by Dentists, TAFE students, Dental School Undergraduates and Postgraduates.</p> <p>We're here to help restore smiles for all ages, by making a variety of orthodontic appliances required post treatment and protecting their teeth with mouthguards. We also produce specialised appliances such as crowns, bridges and implants.</p> <p>Our Laboratory produces all types of dentures, both full and partial in chrome and acrylic to restore lost teeth. If these require repairing or alteration a prompt service is available. Our department also supports the production of maxillofacial restorations such as artificial ears, noses and eyes.</p>
