

CODE: T4700 M3440/1

ID NOS: 8305

DIAGNOSIS: ANEURYSM OF POPLITEAL ARTERY.

CLINICAL HISTORY: M/65. All details are lost in antiquity except that the Wasserman test for syphilis was negative.

MACROSCOPIC: The popliteal space has been dissected to display a saccular aneurysm about 5cm in diameter arising from the popliteal artery. The pale sciatic nerve is running alongside. The dark blood in the vessel had the appearance of a post mortem clot.

MICROSCOPIC: No photomicrograph.
