

CODE: T5530 M3100/2

ID NOS: LEWISHAM 44

DIAGNOSIS: SUBMANDIBULAR GLAND - CALCULI.

CLINICAL HISTORY: M/44. The patient had a history of painful swelling of the left submandibular gland, on and off for 12 months. Clinical examination also revealed stones in the right submandibular duct, which were removed through the ampulla. The left submandibular gland was excised.

MACROSCOPIC: The salivary gland felt firm and the ducts are distended by calculi.

No photomicrographs.
