

CODE: T7700 M7308/2

ID NOS: 143

DIAGNOSIS: PROSTATE – ADENOMYOMATOUS HYPERPLASIA

CLINICAL HISTORY: M/80. The patient had lower urinary tract symptoms, with a clinical diagnosis of benign prostatic hyperplasia causing an enlarged prostate. A suprapubic prostatectomy was performed.

MACROSCOPIC: The specimen consists of a prostate gland with nodular enlargement of the right and left lobes as well as the median lobe.

MICROSCOPIC: There is hyperplasia of both the glands and the fibromuscular stroma. Some glands are dilated and a few contain concretions.
