

CODE: T7800 M3621

ID NOS: 50559

DIAGNOSIS: TORSION OF TESTIS

CLINICAL HISTORY: M/24. No other history is available except that orchidectomy was performed for torsion of the testis

MACROSCOPIC: The specimen has been bisected and shows the testis as a whole to be dark, swollen and haemorrhagic. The body itself is slightly paler than the rest.

MICROSCOPIC: There was haemorrhage an intense congestion. The seminiferous tubules and epithelium of the epididymis were necrotic.
