

CODE: TX700 M9530

ID NOS: HX86223 A15705

DIAGNOSIS: MENINGIOMA OF SPINAL CORD

CLINICAL HISTORY: M/83. For about three months, this patient had complained of increasing weakness of both legs and some loss of bladder control.

MACROSCOPIC: A bean shaped tumour lies within the spinal dura and severely compresses and deforms the spinal cord.

MICROSCOPIC: The tumour consists of bland spindle cells arranged in a whorled pattern.
