

CODE: T1200 M1000/1

ID NOS: F25047 22969

DIAGNOSIS: TEAR IN MEDIAL MENISCUS OF KNEE.

CLINICAL HISTORY: F/35. After twisting her knee, the patient complained of pain and swelling. Limitation of flexion was demonstrated with pain in full extension. The medial meniscus was surgically removed.

MACROSCOPIC: The meniscus shows a typical “bucket handle” tear.
