

CODE: T1536 M5000

ID NOS: Unknown

DIAGNOSIS: LATERAL MENISCUS KNEE - TEAR

CLINICAL HISTORY: Unknown.

MACROSCOPIC: This meniscus shows degenerative changes and a short longitudinal tear at the anterior end.

MICROSCOPIC: None available

COMMENT: Tears of the lateral and medial menisci of the knees are common sports injuries caused by rotational forces to a flexed knee. Degenerative changes of the cartilage occur with age.
