

**CODE:** T0300 M8833

**ID NOS:** HB29649 122336

**DIAGNOSIS:** SUBCUTANEOUS TISSUE - PLEOMORPHIC SARCOMA  
(MALIGNANT FIBROUS HISTIOCYTOMA)

**CLINICAL HISTORY:** F/90. Recurrence of subcutaneous mass which had previously been excised five years earlier.

**MACROSCOPIC:** Bisection of this surgical specimen of skin and subcutaneous tissue shows a mass with a firm pale cut surface.

**MICROSCOPIC:** The sections show a pleomorphic malignant tumour with predominantly spindle shaped cells. There are occasional giant cells and areas of necrosis.
