

CODE: T0300 M9560/3

ID NOS: H48205 22391

DIAGNOSIS: NEURILEMMOMA OF RADIAL NERVE.

CLINICAL HISTORY: M/65. None available.

MACROSCOPIC: The specimen is an oval pale encapsulated lesion.

MICROSCOPIC: The upper part of the field shows bundles of spindle cells with palisading of the nuclei (Antoni 1 pattern). The lower part of the field shows loose cells in a myxoid stroma (Antoni 2 pattern). The features are those of a neurilemmoma /schwannoma of nerve sheath origin.
